## Objective

Results-driven Backend Engineer with about extensive hands-on experience in web and backend development, equipped with proficiency in Javascript, TypeScript, Node.js, PostgreSQL, MongoDb, Redis, and GraphQL. I am eager to apply my skills in developing and maintaining backend systems, contributing to company's growth and success.

## Skills and Expertise

- Proficiency in TypeScript, JavaScript,
- Skilled with Node.js, and framework ExpressJs, NestJs.
- Experienced with PostgreSQL, MongoDb, Redis, and GraphQL.
- Strong analytical skills for data collection, interpretation, and drawing actionable insights.
- Excellent written and verbal communication skills for effective collaboration and clear documentation.
- Familiarity with the web stack, including protocols and web server optimization techniques.
- Self-motivated, adaptable, and experienced in remote work environments.
- Strong interest in cryptocurrency and blockchain technology.

## Experiences

- **Backend Developer • Remote • Contract**                                                    **2024**
  - **Pacifylabs. • (May - June)**
    - Optimized database indexing, enhancing read/write performance with PostgreSQL, leading to faster data retrieval and increased productivity.
    - Implemented a secure backend system, optimizing endpoints, ensuring scalable and clean code architecture, and reducing login errors.
    - Integrated secure payment systems with Paystack and Stripe, ensuring seamless and secure transactions for users.
- **Backend Developer • Remote • Contract**                                                    **2023**
